❌ Indexed Pages

⊙ ⊙ ⊙   ⚙ ⚙ ⚙

3

This is the number of pages on your website that are indexed by search engines. It's important to aim to have all of your web pages crawled and indexed by the search engines, as this gives you more opportunity for your website to be found.

A low number (relative to the total number of pages/URLs on your website) indicates that there is an issue, whether it's due to a bad internal linking structure, or you're unknowingly preventing search engines from crawling your pages.

Make sure your website's XML sitemap (http://blog.woorank.com/2013/03/all-about-xml-sitemaps/) is present and you have submitted it to the major search engines. Building backlinks (http://blog.woorank.com/2013/03/how-to-build-links-to-your-inner-pages/) to your website's internal pages will also help bots to discover, crawl and index (http://blog.woorank.com/2013/05/11-steps-to-get-your-site-indexed-on-google/) them, while building authority to help them rank in the search engines.

Check Google™ Webmaster Tools (https://www.google.com/webmasters/tools) under 'Google Index' and 'Crawl' to keep track of the status of your site's indexed/crawled pages.

❌ Google+ Publisher

⊙ ⊙ ⊙   ⚙ ⚙ ⚙

Your website is missing a rel="Publisher" tag for linking to your Google+ Page.

Your website is missing a rel="Publisher" link to your Google+ Page (https://support.google.com/plus/answer/1713826?hl=en). This type of authorship markup is great for your brand. It ensures that your company is featured in SERPs, as opposed to only individual authors as is common with rel="Author".
